

AGENDIA SCIENTIFIC PRESENTATIONS AT ASCO 2020

FRIDAY, MAY 29 - May 31

Basal subtype and clinical estrogen receptor status of genomically basal breast tumors in Caucasian, African American, and Latin American patients

Authors: Kaklamani, V., et al.
Session: Breast Cancer—Local/Regional/Adjuvant
Abstract #: 556

High Risk breast cancer genes at 8q22-24 and their role in over 5000 patients evaluated with the 70-gene risk of recurrence assay

Authors: Diab, S., et al.
Session: Developmental Therapeutics—Molecularly Targeted Agents and Tumor Biology
Abstract #: 3569

The FLEX real world data platform explores new gene expression profiles and investigator-initiated protocols in early stage breast cancer

Authors: D'Abreo, N., et al.
Session: Health Services Research and Quality Improvement
Abstract #: TPS7088

Adding precision to 2018 ASCO/CAP HER2 testing guidelines in breast cancer with genomic profiling

Authors: Brufsky, A., et al.
Session: Developmental Therapeutics—Molecularly Targeted Agents and Tumor Biology
Abstract #: 3570

12-chemokine gene expression score in breast cancer patients treated with neoadjuvant chemotherapy

Authors: Soliman, H., et al.
Session: Breast Cancer—Local/Regional/Adjuvant and Developmental Therapeutics—Immunotherapy
Abstract #: 591
